

Metko Quality Policy

Metko's Management believes that its employees are the most important means of achieving its company objectives and implementing its commitments. Employees are chosen for their proven skills and experience and for the expectations of the positive changes that their contribution will make to the company's future.

All staff is fully aware of the importance of ensuring that our medical products and services consistently continue to satisfy customer requirements as well as any applicable regulatory requirements, as required by EN ISO 9001:2015, EN ISO 13485:2016, 93/42/EEC Medical Device Directive and Regulation (EU) MDR 2017/745 for medical devices.

As a manufacturer of medical cables, sensors, and accessories, Metko is committed to providing innovative, safe, high-patient value products to the medical device market, complying with legal requirements, and maintaining and continuously improving the effectiveness of the Quality Management System with processes based on a risk approach. Metko will provide all the resources needed to implement an effective quality system.

The primary focus of Metko is to exceed customers' requirements and expectations by delivering high-quality products and services to the total satisfaction of all our customers. Metko will continue to conduct professional training at all levels to increase the knowledge and understanding of its employees and provide information and support together with any equipment to achieve this. Metko will promote a culture whereby all employees will be encouraged to strive for excellence and continuous improvement, implementing of safe, environmentally friendly, and professional working conditions.
